

Optimize your Business with a more efficient IT infrastructure.

Starting at
\$34,900 Installed
\$1162 per month for 36 months*

*Based on qualified credit/FMV lease option

* Cabinet not included

Business Benefits

- Industry-Leading Technologies
- Fully Tested Reference Architecture
- Highly Available and Very Scalable
- Lower Power & Cooling Costs
- Flexibility to Meet Changing Business Goals
- Requires Fewer Physical Servers
- Centralized Administration
- Includes Comprehensive Onsite Deployment Services

Key Features

- Supports Over 15 Applications*
- Scalable From 1-60+TB Storage Capacity

* Based on industry average consolidation ratios

Industry Partners:

The Responsive Data Center.

Dynamic. Efficient. Available.

VMware® Infrastructure is the most widely deployed software suite for optimizing and managing industry standard IT environments through virtualization — from the desktop to the data center. The only production-ready virtualization suite, VMware infrastructure is proven to deliver results at more than 20,000 customers of all sizes, used in a variety of environments and applications. The suite is fully optimized, rigorously tested and certified for the widest range of hardware, operating systems and software applications. VMware Infrastructure provides built-in management, resource optimization, application availability and operational automation capabilities that deliver transformative cost savings as well as increased operational efficiency, flexibility and IT service levels.

How is VMware Infrastructure Used?

VMware Infrastructure delivers a responsive IT — dynamic, efficient and available. Eliminating many of the constraints of traditional hardware, VMware Infrastructure allows companies to:

Implement Production Server Consolidation and Containment.

Contain server sprawl by running software applications in virtual machines on fewer, highly scalable, reliable enterprise-class servers. Customers of VMware Infrastructure have been able to consolidate 10 or more virtual machines per physical processor, thereby drastically increasing server utilization and containing server sprawl.

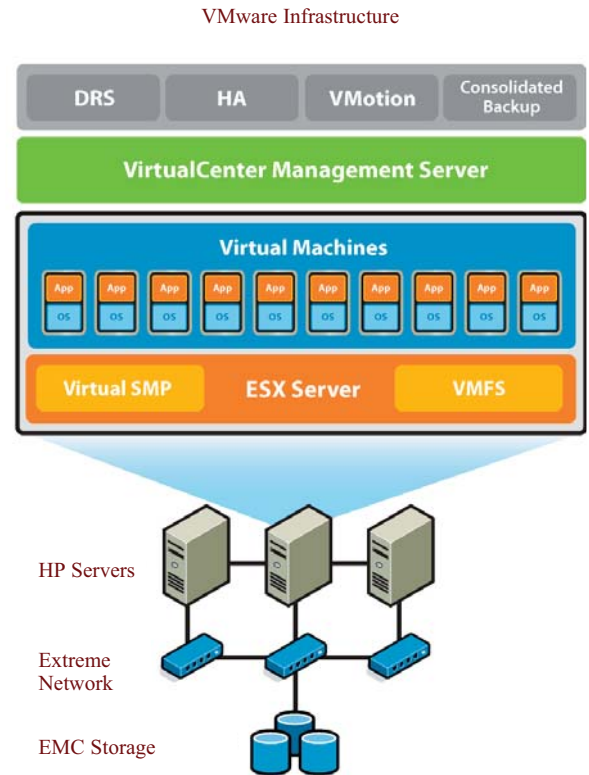

Provide Advanced Business Continuity Protection at Lower Cost.

Deliver high availability for critical applications with cost-effective virtualization-based solutions. With VMware Infrastructure, customers can implement a unified disaster recovery platform that allows many production virtual machines to be recovered in the event of hardware failure without investing in a costly one-to-one mapping of production and DR hardware.

Streamline Software Test & Development.

Consolidate disparate development, testing and staging environments involving multiple operating systems and multi-tier applications. Set up self-service developer portals to increase developer productivity.

For more detailed solution information, contact your Focus sales representative.

Integrated Solution includes:

VMware Essentials Plus

- vSphere ESSL plus bundle for 3 hosts
- vSphere ESSL plus bundle for 3 hosts
1yr Gold Support
- vCenter Server Foundation

HP ProLiant DL360 Servers

- Two (2) ProLiant DL360 G6 Servers w/
Two (2) Quad-Core Intel Processors
16 GB of Memory each

Extreme Summit X350 24pt Switch

- 1 (1) 24-Port 10/100/1000 Switch

EMC CLARiiON AX4-5iSC Storage Array

- 6TB initial useable capacity using RAID 5
- 60 Drive Capacity
- 750GB 7200rpm SATA Drives
- SAS/SATA Drive Support
