

# Optimize your Business with a more efficient IT infrastructure.

\* Cabinet not included

Starting at  
**\$53,500 Installed**  
\$1752 per month for 36 months\*

\*Based on qualified credit/FMV lease option

## Business Benefits

- Industry-Leading Technologies
- Fully Tested Reference Architecture
- Highly Available and Very Scalable
- Lower Power & Cooling Costs
- Flexibility to Meet Changing Business Goals
- Centralized Administration
- Includes Comprehensive Onsite Deployment Services

## Key Features

- Supports Over 60 Desktops\*\*
- Scalable From 3-60+TB Storage Capacity

\*\* Starter Package includes 20 desktop licenses. Additional licenses required to support 60 Desktops

Industry Partners:

## The Responsive Data Center.

**Dynamic. Efficient. Available.**

VMware® Infrastructure is the most widely deployed software suite for optimizing and managing industry standard IT environments through virtualization — from the desktop to the data center. The only production-ready virtualization suite, VMware infrastructure is proven to deliver results at more than 20,000 customers of all sizes, used in a variety of environments and applications. The suite is fully optimized, rigorously tested and certified for the widest range of hardware, operating systems and software applications. VMware Infrastructure provides built-in management, resource optimization, application availability and operational automation capabilities that deliver transformative cost savings as well as increased operational efficiency, flexibility and IT service levels.

## How is VMware Infrastructure Used?

VMware Infrastructure delivers a responsive IT — dynamic, efficient and available. Eliminating many of the constraints of traditional hardware, VMware Infrastructure allows companies to:

### Implement Production Server Consolidation and Containment.

Contain server sprawl by running software applications in virtual machines on fewer, highly scalable, reliable enterprise-class servers. Customers of VMware Infrastructure have been able to consolidate 10 or more virtual machines per physical processor, thereby drastically increasing server utilization and containing server sprawl.

### Provide Advanced Business Continuity Protection at Lower Cost.

Deliver high availability for critical applications with cost-effective virtualization-based solutions. With VMware Infrastructure, customers can implement a unified disaster recovery platform that allows many production virtual machines to be recovered in the event of hardware failure without investing in a costly one-to-one mapping of production and DR hardware.

### Streamline Software Test & Development.

Consolidate disparate development, testing and staging environments involving multiple operating systems and multi-tier applications. Set up self-service developer portals to increase developer productivity.

VMware Infrastructure

## Integrated Solution includes:

### VMware Premier Bundle

- VMwareView premier starter kit 10 Desktops  
1yr gold sns for premier bundle starter kit
- VM View premier bundle -10 Lic  
1yr gold sns for premier bundle

### HP ProLiant DL380 Servers

- Two(2) ProLiant DL380 G6 Servers w/  
Two (2) Quad-Core Intel Processors  
12 GB of Memory each

### Extreme Summit X350 24pt Switch

- Two (2) 24-Port 10/100/1000 Switches

### EMC Clariion AX4 Storage Array

- 3TB initial useable capacity using RAID 5
- iSCSI SAN Connectivity
- SAS/SATA Drive Support/60 Drive Capacity
- 3yr HW/1yr SW EMC Premium Support
