

VIRTUAL CHIEF INFORMATION SECURITY OFFICER

Assess. Protect. Lead.

Security leadership shouldn't be reserved for enterprises with eight-figure budgets. We make sure it isn't. Focus Technology delivers virtual Chief Information Security Officer services that give your organization strategic security leadership, measurable risk reduction, and board-ready reporting - without the cost of a full-time hire. Whether you're navigating compliance mandates, building a security program from scratch, or responding to a breach, our vCISO team brings the experience and structure to get you where you need to be. We assess your risk posture, build a roadmap that actually gets executed, and lead your security function with the same authority as an internal CISO.

OUR vCISO SOLUTIONS

- Security Program Development**
Build or mature a security program aligned to your business risk, regulatory requirements, and operational realities.
- Risk Assessments & Gap Analysis**
Data-driven baseline of your security posture - where you're exposed, where you're over-invested, and what a practical remediation path looks like.
- Compliance & Regulatory Guidance**
Expert navigation of NIST, CIS, SOC 2, HIPAA, CMMC, and other frameworks - mapped to controls you can actually implement and sustain.
- Incident Response Planning**
Develop, test, and refine your incident response and business continuity plans before you need them, not during a crisis.
- Board & Executive Reporting**
Translate technical risk into business language your board, auditors, and leadership team can act on with confidence.
- Vendor & Third-Party Risk Management**
Evaluate and monitor the security posture of your vendors and partners - because your risk doesn't stop at your perimeter.

KEY BENEFITS

- Strategic Security Leadership**
CISO-level direction and accountability without the full-time salary, benefits, and ramp time.
- Cost-Effective Expertise**
Access seasoned security leadership on a flexible engagement model that scales with your needs and budget.
- Reduced Risk Exposure**
Structured programs and accountability frameworks that close gaps, reduce attack surface, and satisfy auditors.
- Measurable Program Maturity**
Security roadmaps with defined milestones and metrics so you always know where your program stands and where it's going.

FREE SECURITY POSTURE ASSESSMENT

Most organizations don't have a clear picture of their actual security risk - they have policies, tools, and a checklist that may or may not reflect the threats they actually face. Misaligned controls, unaddressed compliance gaps, and the absence of executive-level security ownership are costing you more than you realize. Get a clear view of where you stand, what your critical exposures are, and exactly what it would take to build a security program that protects and enables your business. No sales pitch. Just answers.
